

Ham Radio License Training and Exam

When All Else Fails....Amateur Radio Works

In a disaster, radio communications will be critical. Amateur (Ham) radio has proven vital to that radio communication in a wide range of international disasters. There is no other radio communication method widely available that has proven reliable.

For yourself, your family, your neighborhood and your community, you want to earn the license, obtain the equipment and then practice!

This course covers all the material for the Technician Amateur Radio license (the basic level of license). Friday evening and Saturday morning you will receive instruction and become familiar with the types of questions that are on the standardized test. Saturday afternoon you will take AND PASS the exam.

For more information there is a Ham Class Supplement [here](#).
